Great windows. Great value.

# VERONA

BY SIMONTON™

Are you looking for a great window that also happens to be a great value? Verona by Simonton™ windows are the perfect balance of value, quality and energy efficiency. Verona windows are an affordable way to make your home more beautiful, comfortable and energy efficient, and they're covered by an excellent warranty that even includes labor. Best of all, they're backed by a company that has been providing outstanding service and support for more than 60 years.

## Features

*A host of styles, shapes and sizes make Verona windows the right choice to add curb appeal to your home.*

The standard cam locks are designed to pull sash together, securing a more weathertight fit. Attractive color-matched hardware is standard on every Verona window.

The offset baffled weep system reduces blowback and deters insects.

On Slider windows, the roller system features a raised track for smooth and easy operation.

With Verona windows, you don't have to bother with the hassle of sanding, repainting or bothersome maintenance. Verona windows are very easy to live with. They're made of quality, low-maintenance vinyl that easily wipes clean with a damp cloth.

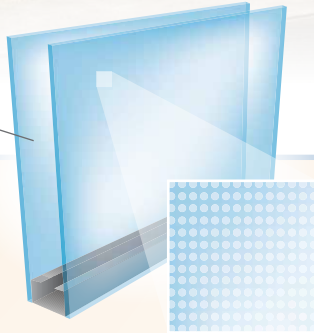

## Greater comfort. Lower energy bills.

Verona windows can help save money on your energy bills. Their profiles are made of vinyl, which is an excellent insulator. They also feature a 3/4" insulating glass unit, a warm-edge spacer system and double-strength glass for superior thermal efficiency to help lower energy costs and make your home more comfortable. For even greater performance, an Argon gas fill and Low E glass are available.

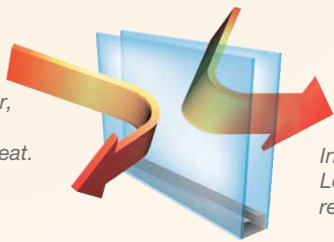

Argon gas filling reduces heat transfer from inside to outside.

Available Low E glass and an Argon gas fill perform much better than clear glass for a dramatic improvement in thermal performance.

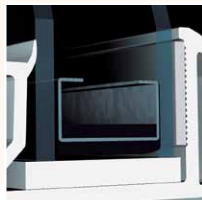

A special Low E coating of microscopic metallic oxide reflects heat back inside.

In summer, Low E deflects heat.

In winter, Low E helps retain warmed air.

The warm-edge spacer system provides excellent thermal performance for a more comfortable home and lower energy costs all year long.

Verona windows can be ordered to meet ENERGY STAR® guidelines in every area of the country.

Thanks to the enduring quality of premium vinyl, Verona windows need replacing less often than many other windows, helping to conserve resources and reduce their impact on the environment.
